6. Case Study

A participant's story

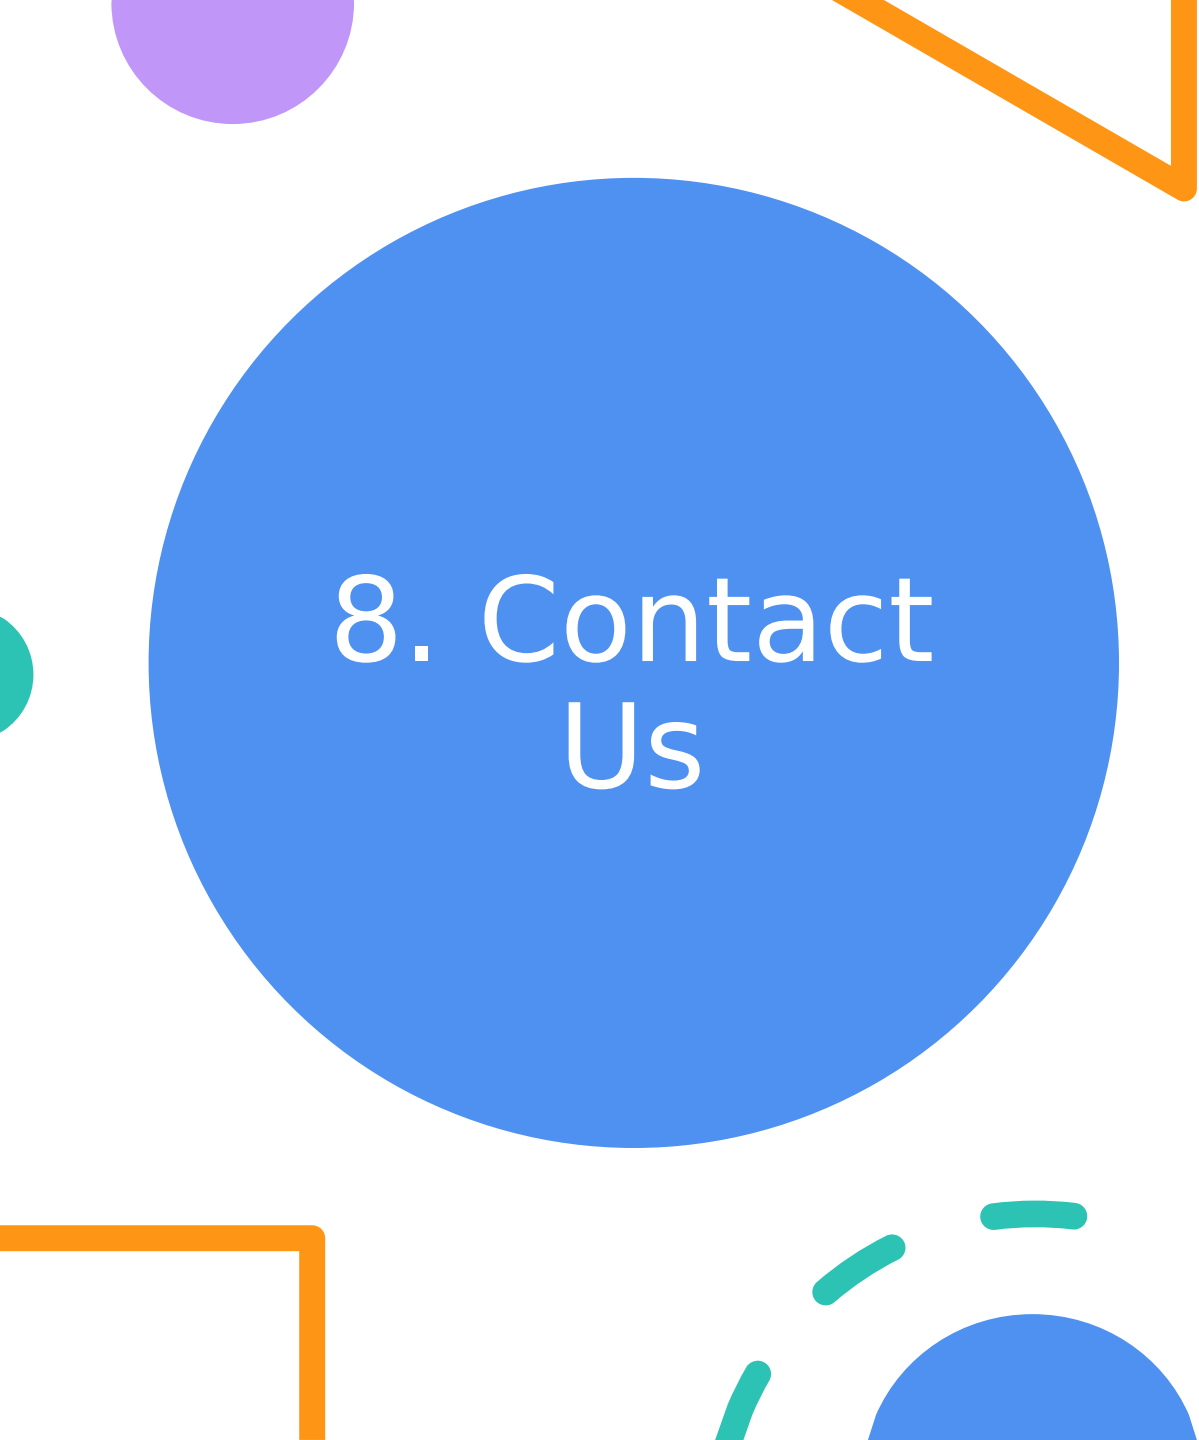

"I was in a place where I felt nobody was listening to me and I had nowhere to turn and no one to talk to. ... I am now receiving the support I need and starting to turn my life around. I know it's going to be a long road to recovery, but I know that with their continued support I am one step closer to feeling normal again. Their support has been fundamental to helping in my recovery and I see the work they do for other people is just as amazing as it was for me."
